

Exercises

Apply the four steps described on the poster:

1. Put a crossing on each edge,
2. Connect the bits of threads as in a maze,
3. Stress the Over/Under features with the little guide,
4. Thicken the threads by building a bridge for each crossing and extending the road.

Remember, **each** crossing is at the middle of an edge and **each** edge bears a crossing.

One edge = one crossing

And to connect the bits of threads, repeat

Follow the wall, turn the corner, follow the wall
