

Exercice

Apply the four steps described on the poster:

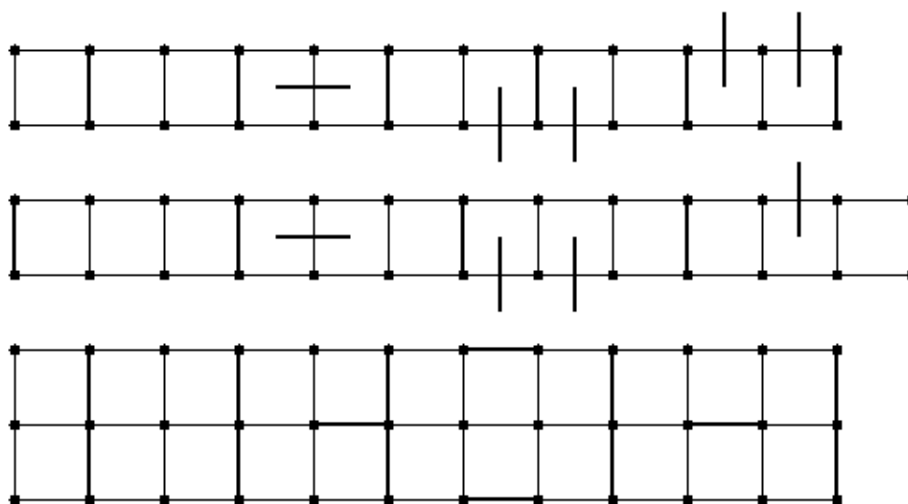

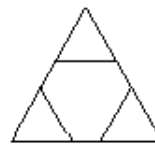

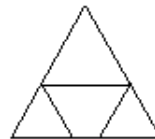

1. Put a crossing on each edge,
2. Connect the bits of threads as in a maze,
3. Stress the over/under features with the little guide,
4. Thicken the threads, first the bridges then the road.

Remember, **each crossing** is at the **middle of an edge** and **each edge** bears a crossing.

One edge = One crossing

And to connect the bits of threads together, remember:

Follow the wall, turn the corner, follow the wall.

Tear off this little guide:
